Name: Omar Ghieh   Project 2

Hello, the main idea of this website, company to give us internet, the first page is login, you can create new account by "Sign up".
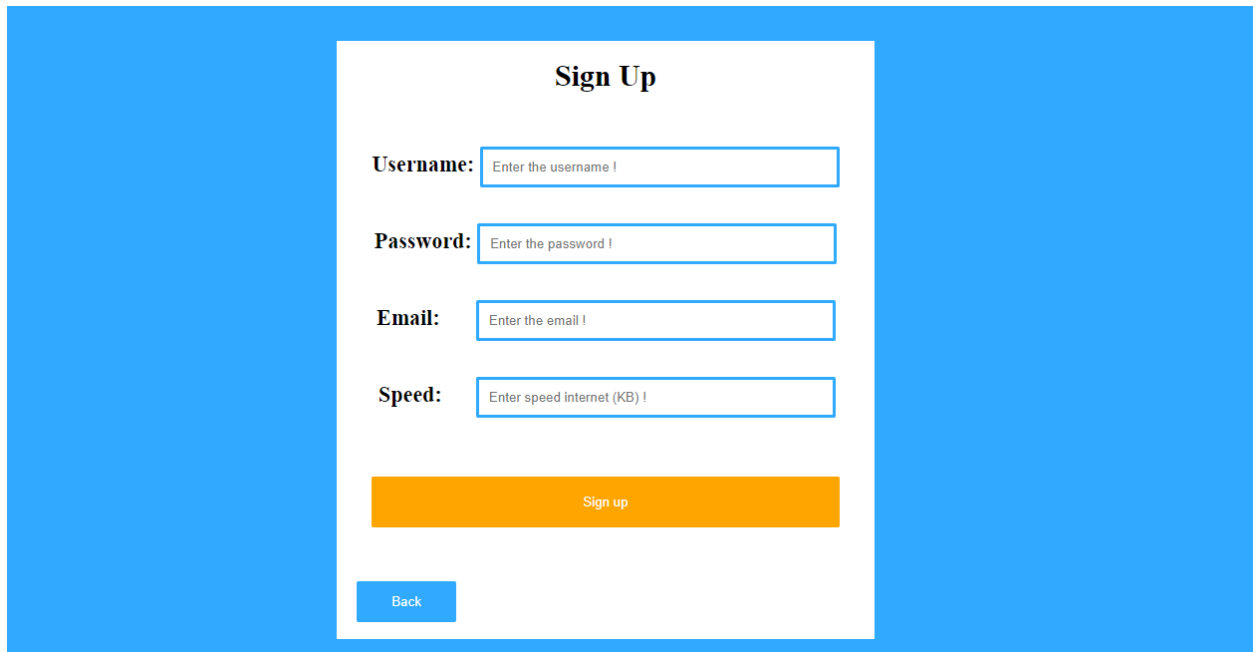

Write username, password, Email, and the speed of internet but write the speed of internet by KB, I wrote in placeholder, why should you write the speed of internet by KB, because when you write the speed, I wrote code to put automatically the Price in database.

Sign Up

Username: Enter the username !

Password: Enter the password !

Email: Enter the email !

Speed: Enter speed internet (KB) !

Sign up

Back

when you create new account you can log in, and write the username and the password, and you can go to the services page,

Services page, as you see we display all the data username and speed, and price, of all the users.

UserName: Omar Ghieh   Speed: 200 KB   Price: 20$

Services   Contact me   About

Omar Ghieh

Logout

#	Speed	Price
1	100 KB	8$
2	200 KB	15$
3	300 KB	22$
4	400 KB	33$
5	500 KB	43$
6	600 KB	55$
7	700 KB	63$
8	800 KB	75
9	900 KB	88$

I wrote code of this tool to calculate the speed of internet, if the user need the change the speed of internet, you can see the price of any speed.

Speed Calculator

Speed: [   ] KB

Price($):

Calculate

These the best 5 websites to test speed of internet.

How to test your speed?

SPEEDTEST

Internet Health Test

Xfinity xFi Speed Test

Testmy.net

Speedof.me

Contact me page, you should write the Email,Name,Message(problem), and if you like, put the screenshot of this problem, and click Submit.

The image will go to the file "problems".

Reset

About page.

Hello, How are you?

This website to explain about the services of internet and you can choose (Speed) of internet ,and when you sign up don't forget the username or password
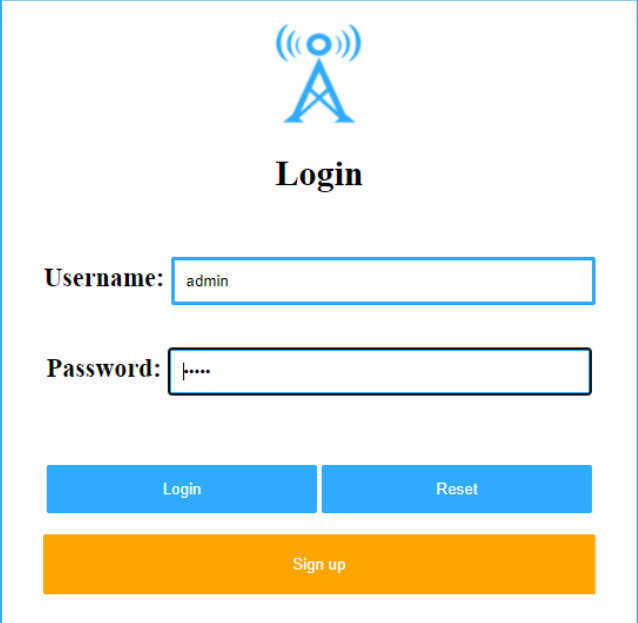

if you forget you can go to contact me page and send the feedback

to forget the password and we can change the password

Thank you for visited My website :)

Now when you write in username and password "admin", you can go to the admin page.

Admin page you can edit and delete any data, and when the user sends the problems in "Contact me", you see all the problems and when you put "Solved" the problems will be deleted.

Users page, as you see, only admin can see this data of users. ⬇
